

1 & 2 Gang Modifiable Weatherproof Boxes

***The only field-modifiable, UL "Listed for the Purpose"
WP Box in the Industry!!!!***

CMI's new Weatherproof Box meets NEC requirements and is UL "Listed for the Purpose".

Our SG box is **22.5** vs. 18 cubic inches for a standard single gang Weatherproof Box.

The box comes with or without a selection of $\frac{1}{2}$ " or $\frac{3}{4}$ " lock nuts to be used with TA's. Weatherproof hubs or liquid tight fittings can also be used.

CMI's new box is economical to stock and gives you the freedom to use the exact size and geometry you need for any job.

SAVE MONEY!!!!

No more wasted trips to get the exact box that you need for a job.

No need to carry all those different combination boxes on your truck anymore.

Using a hole saw, drill holes into the box on the pre-marked lines and build your own combination on the jobsite. Instructions are actually molded to the back of the box.

Patent Pending
