

CMI'S NEW 2"/1.5" IN-LINE CHECK VALVE

CMI'S NEW In-Line Check Valves are manufactured from high quality materials to ensure high reliability and low maintenance. They are suitable for 2" or 1.5" applications. The Check valve with sight glass can be replaced (slides out) without removing end caps. The valve assembly has a clear connection for easy viewing of proper flow.

NO UNIONS REQUIRED

The In-Line Check Valve has low pressure drop and provides ease of installation with 2" spigot by 1.5" socket slip connections. This product has a serviceable check valve cartridge; simply remove one threaded rod and slide out the sight glass and valve cartridge.
